

Notice of New Pedernales Electric Cooperative Specifications

Posted December 6, 2019

Underground Installation Specifications

Removed specifications:

- 560-010 – 1 Φ Riser Pole
- 560-020 – 3 Φ Riser Pole

These drawings, which feature U guard riser installations, were removed due to an updated PEC standard. PEC's current standard calls for riser installations with cable in conduit on a standoff bracket.
