

Renewable Energy Programs

We are proud of our longstanding commitment to renewable energy options. We offer several options to reduce future electricity consumption and help members who want to participate in responsible energy initiatives.

PEC INTERCONNECT PROCESS

Our cooperative has a robust and comprehensive interconnection process that is run by a project team solely focused on helping with installing solar, batteries, or other on-site solutions to meet members' needs.

Learn more at pec.coop/interconnection-process.

LOWER COLORADO RIVER AUTHORITY CONTRACT

We have a long-term supply contract with the Lower Colorado River Authority, a leader in bringing renewable energy to Texas. LCRA continually seeks opportunities to purchase wind and solar power, and energy storage for its customers at competitive market rates. The current LCRA portfolio includes 151 MW of wholesale solar and 295.1 MW of hydroelectric generation.

PEC CARES

At PEC, we live, work in, and are a part of the communities we serve. It's our responsibility to be a good neighbor and steward of the environment through everyday business practices, providing sustainable rate options, and helping our members conserve energy.

Learn more at pec.coop/cares.

RENEWABLE ENERGY RIDER

Would you like to power your home or business with 100% renewable energy? Our Renewable Energy Rider Rate lets you go green by just checking a box. We offer Texas Renewable Energy Credits (RECs) to members for an added fee, and sell any remaining RECs to maximize value to membership.

Learn more at pec.coop/rer.

COMMUNITY SOLAR PROGRAM

The Community Solar Program is powered by solar sites across the PEC service territory, giving members the opportunity to purchase a portion of their energy from these facilities

INTERCONNECT RATES

If you are considering a distributed generation (DG) installation, the website provides information on the process and rates.

For interconnection rates 50 kW or less, including most residential installations, visit pec.coop/dg-rates.

For interconnection rates 50 kW or more, visit pec.coop/large-dg-rates.
