

PEC to return
\$6 million
in capital credits in 2023

As a PEC member, you're an owner in this cooperative — so rather than earning profits, PEC returns to you any income not used for building and operating the electric system that powers your life. The funds returned to you are called capital credits.

In December 2022, the board approved \$6 million in capital credits to be distributed on members' January 2023 bills! Returning capital credits is part of the cooperative difference and just one of the many benefits of your membership.
