

## CAMP CRAFT: Glow-in-the-Dark Light Bulb

This week at Camp Save-a-Watt, we'll be learning about the power of circuits and the invention of the light bulb. This craft is a fun way for you to make your own and use the power of the sun to make your light bulb shine.

### Supplies needed:

- Thick paper or cardstock
- Aluminum foil
- Glue
- Glow-in-the-dark paint
- Cotton balls

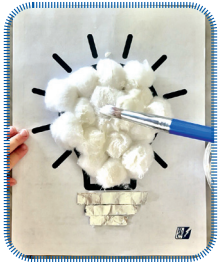

# 1

Print out the Light Bulb printable on thick cardstock. Glue the cotton balls to the paper.

# 2

Cut or tear a piece of aluminum foil for the bottom part of the bulb and glue to the paper.

# 3

Paint the cotton balls with the glow-in-the-dark paint.

# 4

After the glue dries, power with the sun and you'll have some after dark artwork.
